Preface

Asian People contains final statistics from the Census of Population and Dwellings held on 6 March 2001. It is one of a series of reports that provide detailed statistics on the characteristics of New Zealand's population, households and dwellings.

The information in this report covers a wide variety of demographic, social and economic subjects for the Asian ethnic group(s). The tables in this report relate to the Asian ethnic group(s) census usually resident population count (ie people in the Asian ethnic group(s) who normally live in New Zealand and who were in the country on census night).

The ethnicity question is one of several census questions in which people may provide more than one response. The tables in this report refer to total Asian ethnic group(s) responses. This means that tables include individuals who indicated an Asian ethnic group as their sole ethnic group, or as one of several ethnic groups.

This report provides information on the Asian ethnic group as well as the eight largest Asian ethnic groups in New Zealand: Chinese, Indian, Korean, Filipino, Japanese, Sri Lankan not further defined, Khmer/Kampuchean/Cambodian and Thai/Tai/Siamese.

Statistics New Zealand makes census data available to a wide range of people. The data is important to planners and policy-makers, researchers, community groups and the general public. A range of information from the 2001 Census has been published and is available free on the Statistics New Zealand website. More information will continue to be published and made available free on the website throughout 2002. In addition to published statistical information, Statistics New Zealand can provide customised information to meet the specific needs of users on a cost recovery basis.

Statistics New Zealand acknowledges the contribution of New Zealanders in their overwhelming support of the 2001 Census, and of the large number of people involved in planning, collecting, processing and disseminating the information.

Brian Pink
Government Statistician

Information Centre

Your gateway to Statistics New Zealand

Each year, we collect over 60 million pieces of information. New Zealanders tell us how and where they live; about their work, spending and recreation. We also collect a complete picture of business in New Zealand. This valuable resource is yours to use. But with all the sophisticated options available, finding exactly what you need can sometimes be a problem.

Giving you the answers

Our customer services staff provide the answer. They are the people who know what information is available, and how it can be used to your best advantage. Think of them as your guides to Statistics New Zealand. They operate a free enquiry service where answers can be quickly provided from published material. More extensive answers and customised solutions will incur costs, but we always give you a free no-obligation quote before going ahead.

Liability statement

Statistics New Zealand gives no warranty that the information or data supplied contains no errors. However, all care and diligence has been used in processing, analysing and extracting the information. Statistics New Zealand shall not be liable for any loss or damage suffered by the customer consequent upon the use directly, or indirectly, of the information supplied in this product.

Reproduction of material

Any table or other material published in this report may be reproduced and published without further licence, provided that it does not purport to be published under government authority and that acknowledgement is made of this source.

Standards

Symbols

The interpretation of the symbols used throughout this report is as follows:

- nil or zero
- amount too small to be expressed
- .. figures not available
- ... not applicable
- nfd not further defined
- nec not elsewhere classified
- C confidential

Confidentiality

The Statistics Act 1975 sets out strict requirements on Statistics New Zealand to protect the confidentiality of information obtained from respondents during the Census of Population and Dwellings and other surveys. Action is taken at every stage of the census to make sure that only authorised people work with individual returns, and then with only as much as they need to know for that stage of the process. All staff who work on the census and other surveys have signed a Declaration of Secrecy.

It is an offence for any staff member to break the statutory declarations of secrecy that they make, and there is a very long history and tradition of consistent performance with keeping confidences over many censuses. Such a record supports the high level of public trust in Statistics New Zealand, and has led to the high levels of response to the census by New Zealanders.

During the collection of documents, there were arrangements for forms to be collected in sealed envelopes, should that option be chosen by a household or person. The names and addresses of respondents were used to ensure that all forms were collected from a household and are not part of the final computerised information.

When the census paper forms have been processed, Statistics New Zealand continues to have clear, statutory obligations to maintain the confidentiality of the census data in its custody. The Statistics Act includes a section that overrides the legal investigative

powers of other government agencies to obtain information. In publishing statistical tables and other aggregated statistics from the census datasets, Statistics New Zealand employs measures such as random rounding to protect the confidentiality of individual information.

Random rounding

Since the 1981 Census, Statistics New Zealand has utilised a confidentiality assurance technique of randomly rounding census statistics to base three. This enables the greatest possible amount of census data to be released without compromising the privacy of individual responses.

Under the random rounding process, all table cell values, including row and column totals, are rounded as follows

1. Zero counts and counts which are already multiples of three are left unchanged.
2. Other counts are rounded to one or other of the two nearest multiples of three.

All rounding, including separate rounding of totals and sub-totals is carried out on the recorded results. The probabilities of rounding up or down are set so that the long run expected value equals the original count. For example, an original count of 17 would be rounded to 15 with a probability of 1/3 and rounded to 18 with a probability of 2/3, since $15 \times 1/3 + 18 \times 2/3 = 17$. The effect of this rounding on the accuracy of census statistics for practically any proposed use is insignificant.

Rounding procedures

On occasions, figures or percentages have been rounded off to the nearest unit or decimal point. This may result in a total disagreeing with the total of the individual items as shown in tables.

Calculation of ratios

Unless otherwise stated, the 'not stated' category has been excluded from the denominator in calculation of ratios and percentages.

List of Tables

1. Asian ethnic groups – up to three responses (total responses), for the census usually resident population count, 1991, 1996 and 2001	19
2. Selected summary characteristics, for the Asian ethnic groups census usually resident population count, 1991, 1996 and 2001	21
3. Age group by sex, for the Asian ethnic groups census usually resident population count, 1991, 1996 and 2001	24
4. Regional council, urban and rural area and sex by age group, for the Asian ethnic groups census usually resident population count, 2001	25
5. Birthplace and sex by age group, for the Asian ethnic groups census usually resident population count, 2001	30
6. Birthplace and sex by years since arrival in New Zealand, for the overseas-born Asian ethnic groups census usually resident population count, 2001	31
7. Ethnic groups (single and combination) and sex by age group, for the Asian ethnic groups census usually resident population count, 2001	32
8. Language spoken (total responses) by birthplace and sex, for the Asian ethnic groups census usually resident population count, 2001	34
9. Religious affiliation (total responses) and sex by age group, for the Asian ethnic groups census usually resident population count, 2001	37
10. Legal marital status and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001 ..	38
11. Social marital status and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001 ..	39
12. Tenure holder and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	40
13. Years since arrival in New Zealand and sex by tenure holder, for the overseas-born Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	41
14. Highest qualification and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001 ..	42
15. Sources of personal income (total responses) and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	43
16. Total personal income and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001 ..	45
17. Work and labour force status and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	47
18. Status in employment and sex by age group, for the employed Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	48
19. Occupation (major group) and sex by age group, for the employed Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	49

List of Tables (continued)

20. Industry (division) and sex by age group, for the employed Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	50
21. Unpaid activities (total responses) and sex by age group, for the Asian ethnic groups census usually resident population count, aged 15 years and over, 2001	52
22. Age group and sex by selected Asian ethnic groups – up to three responses (total responses), for the census usually resident population count, 1991, 1996 and 2001	53
23. Regional council, urban and rural area and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, 2001	57
24. Birthplace and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, 2001	67
25. Years since arrival in New Zealand and age group by selected Asian ethnic groups (total responses), for the overseas-born census usually resident population count, 2001	69
26. Language spoken (total responses) and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, 2001	72
27. Religious affiliation (total responses) and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, 2001	78
28. Legal marital status and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	82
29. Social marital status and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	86
30. Tenure holder and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	92
31. Tenure holder and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	94
32. Highest qualification and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	96
33. Highest qualification and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	100
34. Sources of personal income (total responses) and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	106

List of Tables *(continued)*

35. Total personal income and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	110
36. Total personal income and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	114
37. Work and labour force status and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	122
38. Work and labour force status and age group by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	124
39. Status in employment and sex by selected Asian ethnic groups (total responses), for the employed census usually resident population count, aged 15 years and over, 2001	128
40. Occupation (major group) and sex by selected Asian ethnic groups (total responses), for the employed census usually resident population count, aged 15 years and over, 2001	130
41. Industry (division) and sex by selected Asian ethnic groups (total responses), for the employed census usually resident population count, aged 15 years and over, 2001	134
42. Unpaid activities (total responses) and sex by selected Asian ethnic groups (total responses), for the census usually resident population count, aged 15 years and over, 2001	138
43. Household access to telecommunication systems (total responses) by selected Asian ethnic groups (total responses), for usual residents in households, 2001	142

Highlights

The Asian population in New Zealand grew rapidly in the decade to 2001, with Asian people now forming a significant part of the New Zealand population. Yet within the broad category of 'Asian', there are many individual ethnic groups with distinct demographic characteristics.

As well as covering the Asian population as a whole, this report also presents statistics on the eight largest Asian ethnic groups in New Zealand: Chinese, Indian, Korean, Filipino, Japanese, Sri Lankan, Cambodian and Thai. The Chinese and Indian ethnic groups, which are by far the largest Asian ethnic groups, are also split by birthplace into New Zealand-born and overseas-born populations. References to the Indian ethnic group include individuals who reported Fijian Indian/Indo-Fijian ethnicity. The analysis is based on the Asian ethnic group(s) census usually resident population count, which excludes short-term visitors. Comparisons with the total New Zealand population incorporate figures from the *National Summary*.

Population

In 2001, 6.6 percent (237,459) of the census usually resident New Zealand population identified as belonging to one or more Asian ethnic groups. This represented an increase of 37 percent (63,957) since 1996 – a lower level of growth than between 1991 and 1996 when the Asian population increased by 74 percent (73,743). Over the whole decade, the Asian

population in New Zealand has more than doubled from 99,756 in 1991 when it formed 3 percent of the total New Zealand population.

The Chinese ethnic group is the largest Asian ethnic group in New Zealand, comprising 44 percent of the Asian population and 3 percent of the total New Zealand population in 2001. The next largest is the Indian ethnic group (26 percent of the Asian population) followed by the Korean (8 percent), Filipino (5 percent), Japanese (4 percent), Sri Lankan (3 percent), Cambodian (2 percent) and Thai (2 percent) ethnic groups. As figure 1 shows, the Chinese ethnic group experienced the largest increase in population between 1991 and 2001 (an increase of 59,790 or 133 percent), followed by the Indian ethnic group (up 31,197 or 102 percent). Over the same period, the Japanese and Filipino populations grew by 7,035 and 6,174, respectively. Proportionately, the Korean ethnic group experienced the highest growth over the decade, increasing by more than 20 times from 930 in 1991 to 19,023 in 2001. The Thai ethnic group also experienced a large percentage increase of 335 percent (an increase of 3,507 people) during this period.

Ninety percent of the Asian population reported their ethnicity or ethnicities as being solely Asian. Eight percent of people who reported an Asian ethnicity also reported a European ethnicity, while 3 percent reported a Pacific ethnicity. In 2001, 3 percent of the Asian ethnic group also stated Māori as their ethnicity.

Figure 1

Selected Asian Ethnic Group Populations, 1991 and 2001

Ethnic Group	1991	2001	Change
New Zealand-born Chinese	15,264	25,473	10,209
Overseas-born Chinese	28,401	78,519	50,118
Total Chinese	44,793	104,583	59,790
New Zealand-born Indian	9,501	17,550	8,049
Overseas-born Indian	20,517	43,923	23,406
Total Indian	30,606	61,803	31,197
Korean	930	19,023	18,093
Filipino	4,917	11,091	6,174
Japanese	2,970	10,002	7,032
Sri Lankan	2,406	6,036	3,630
Cambodian	4,320	5,265	945
Thai	1,047	4,554	3,507

Age and Sex

The Asian population is relatively youthful. As figure 2 illustrates, greater proportions are in the younger age groups and smaller proportions are in the older age groups compared with the total population. Although there are similar proportions of children in the Asian and total New Zealand populations (24 percent and 23 percent, respectively), young people (those aged 15-24 years) made up a larger share of the Asian population. In 2001, those aged 15-24 years comprised 21 percent (50,991) of the Asian population – up from 18 percent (18,348) in 1991. This age group comprised 14 percent of the total New Zealand population in 2001. Conversely, people aged 65 years and over accounted for 4 percent of the Asian population and 12 percent of the total New Zealand population.

In 2001, the median age of the Asian population in New Zealand was 28.3, an increase from 26.7 in 1991, but still lower than the comparable figure for the total New Zealand population (34.8 years).

The Asian ethnic groups with the lowest median ages in 2001 were the Korean (24.6 years) and Cambodian groups (24.8 years), while the Sri Lankan and Filipino groups had the highest median ages (33.3 years and 31.5 years, respectively). The Thai ethnic group had a median age similar to that of the total Asian population (28.0 years). Although the median age of the Chinese ethnic group was 28.8 years, the overseas-born Chinese population had a much higher median age (34.2 years) than the New Zealand born Chinese population (12.4 years). Over half (56 percent) of New Zealand-born Chinese were aged under 15 years in 2001, reflecting the fact that new immigrants often start New Zealand-born families. Similarly, the median age of the overseas-born Indian population was much higher than that of the New Zealand-born Indian population (34.6 years and 11.0 years, respectively). In 2001, the Indian ethnic group as a whole had a median age of 29.0 years.

Females outnumber males in the Asian ethnic group, comprising 53 percent of the Asian population in 2001. The largest sex imbalances occur among the Filipino, Thai and Japanese populations, in which females comprise 64 percent, 63 percent and 62 percent respectively.

Geographical Distribution

The vast majority of Asian people are urban dwellers. In 2001, 94 percent were living in main urban areas (areas with populations greater than 30,000). Almost two-thirds (149,121) of the Asian population were living in the Auckland urban area, with the majority (107,802) concentrated in central and southern Auckland. The next largest concentration of Asian people was in the Wellington urban area (11 percent), followed by Christchurch (7 percent) and Hamilton (4 percent). Eighty-eight percent of the Asian population was living in the North Island in 2001.

Among the Asian ethnic groups, the Korean ethnic group was the most likely to live in the Auckland urban area (69 percent). The overseas-born Indian and overseas-born Chinese populations were also highly concentrated in Auckland (70 percent and 69 percent, respectively). The Japanese ethnic group was least likely to be living in Auckland (41 percent), with 19 percent (1,878) of Japanese people based in the Christchurch urban area.

Birthplace

For the purposes of this report, the Asia region extends from Afghanistan in the west to Indonesia in the east.

In 2001, over three-quarters (78 percent) of the usually resident Asian population was born overseas – an increase from 71 percent in 1991. The majority (85 percent) of the overseas-born Asian population in New Zealand was born in the Asia region – an exception being the Indian ethnic group. In 2001, over half (53 percent) of the overseas-born Indian population in New Zealand was born outside of Asia.

Figure 2

Age Structure of the Asian and Total New Zealand Populations, 2001

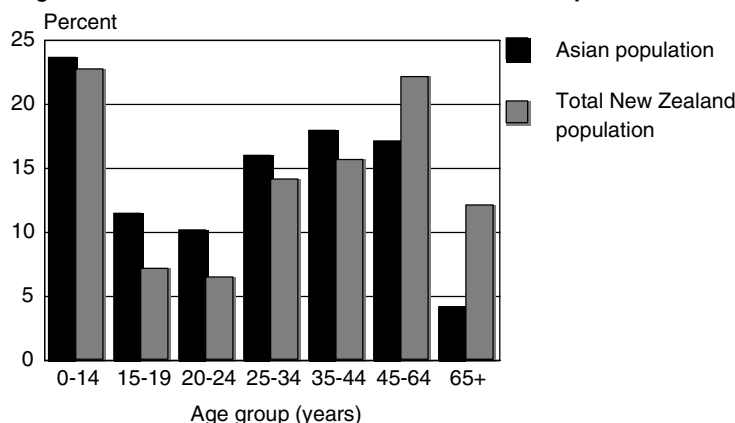

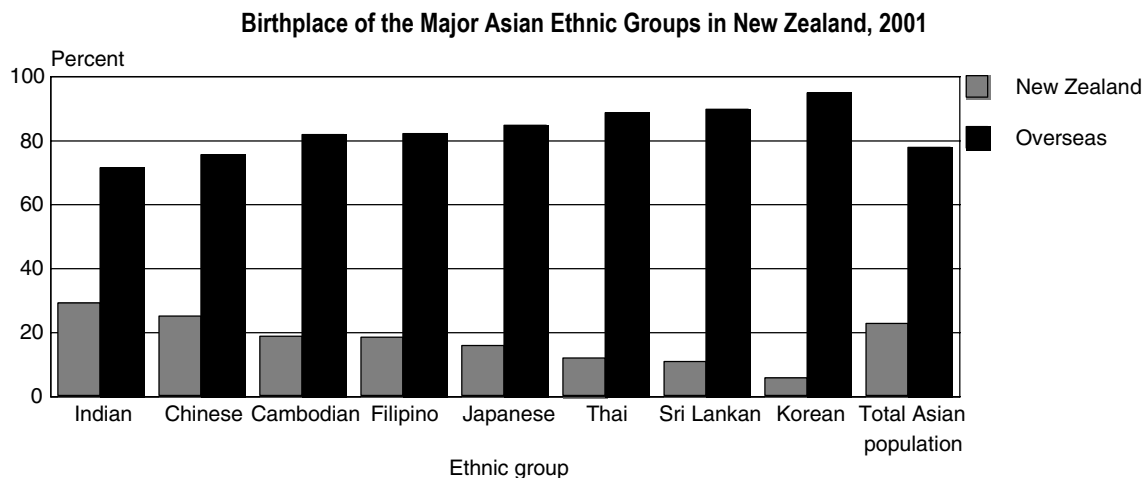

Figure 3

The Asian ethnic groups with the highest proportions of New Zealand-born people were the Indian (29 percent) and the Chinese (25 percent) ethnic groups, as is shown in figure 3. In 2001, almost a fifth of the Cambodian (19 percent) and Filipino (18 percent) ethnic groups were New Zealand born. Members of the Korean ethnic group were the least likely to be born in New Zealand (5 percent).

Nearly three-quarters (125,085) of the overseas-born Asian population had been in New Zealand for less than 10 years in 2001. Just under half (82,086) of the overseas-born population had been in New Zealand for less than five years, while 14 percent (24,723) had arrived in the 12 months preceding the 2001 Census. The Chinese ethnic group had the highest number of people who had been in New Zealand for less than a year (9,165) – the majority of whom (60 percent) were aged under 25 years; next largest were the Indian (5,349), Korean (3,822) and Japanese (2,316) ethnic groups.

Of those Asian people who had been living in New Zealand for less than ten years, over half (55 percent) were born in North-East Asia, while a further 18 percent were born in South-East Asia and 15 percent in Southern Asia. Females formed 54 percent of those who had arrived in New Zealand between 1991 and 2001.

Language

English is by far the most widely spoken language among the usually resident Asian population in New Zealand. In 2001, 85 percent of Asian people with a language were able to speak English, with nearly a quarter (24 percent) only speaking English. The next most common languages were Yue or Cantonese (16 percent of Asian people with a language), Northern

Chinese or Mandarin (12 percent) and Hindi (10 percent). Among those with a language, people in the Filipino (99 percent) and Sri Lankan (95 percent) ethnic groups were most likely to be able to speak English; the Korean (73 percent) and Cambodian (74 percent) ethnic groups had the lowest proportions of English speakers.

Housing

In 2001, 39 percent of Asian people aged 15 years and over stated they owned or partly owned their own home (compared with 55 percent of the adult New Zealand population). Home ownership was more common among the older age groups, with 57 percent of those in the 35-44 year age group and 65 percent of Asian people in the 45-64 year age group owning their own home. Forty percent of Asian women owned their own home in 2001 – a slightly higher level than for Asian men (37 percent).

Among the Asian ethnic groups, the Filipino ethnic group (42 percent) had the highest level of home ownership, closely followed by the Chinese and Indian ethnic groups (both 41 percent). Around 35 percent of the Korean and Sri Lankan ethnic groups owned their own home, while the equivalent proportion for the Cambodian and Japanese ethnic groups was 31 percent. In 2001, the Thai ethnic group had the lowest rate of home ownership (22 percent).

The proportion of Asian people living in rented dwellings has increased from 33 percent in 1991 to 38 percent in 2001. This trend mirrors the national trend away from home ownership, with the proportion of the total New Zealand population living in rented dwellings increasing from 25 percent in 1991 to 33 percent in 2001.

Educational Qualifications

A relatively high proportion of Asian people hold formal educational qualifications. In 2001, 86 percent of Asian adults aged 15 years and over held a qualification, compared with 72 percent of the total adult New Zealand population. Over the decade, the proportion of Asian people with qualifications rose by 12 percentage points – echoing the increase in Asian people aged 15-24 years. In 2001, over a third (35 percent) of Asian people with a qualification had obtained their highest qualification at an overseas school.

Similar proportions of the Asian and total New Zealand populations held a post-school qualification (34 percent and 32 percent, respectively), but Asian people were far more likely to hold a degree. In 2001, nearly a quarter (23 percent) of the Asian population had obtained a bachelor degree or higher qualification – almost double the equivalent figure of 12 percent for the total New Zealand population. Twenty-five percent of Asian men held a degree while the comparable figure for Asian women was 22 percent.

Asian people are also highly involved in full-time and part-time study – reflecting the fact that a fifth of the usually resident Asian population is aged between 15 and 24 years. In 2001, 50 percent of young Asian people (aged 15-24 years) were studying full time (20 hours or more). In total, nearly two-thirds (63 percent) of Asian people in this age group reported that they were studying either full time or part time at a school or any other place. Among the total New Zealand population, the equivalent figures for those aged between 15 and 24 years were much lower (36 percent and 47 percent, respectively).

People in the Sri Lankan ethnic group were most likely to have a formal educational qualification (97 percent), followed by those in the Korean, Filipino and Japanese ethnic groups (all 93 percent). The Cambodian ethnic group recorded the lowest proportion (47 percent) with a formal qualification in 2001. Overseas-born Chinese

people (86 percent) were slightly more likely to hold a qualification than Chinese people born in New Zealand (83 percent) – a situation replicated among the Indian ethnic group.

Figure 4 shows that the Filipino ethnic group had the highest proportion of people with a bachelor degree or higher qualification (41 percent). High proportions of people in the Sri Lankan (37 percent), Indian (24 percent) and Chinese (22 percent) ethnic groups also held a degree. Among New Zealand-born Chinese, 23 percent had obtained a degree, while the equivalent figure for New Zealand-born Indians was 16 percent.

The Filipino ethnic group and the Thai ethnic group were the only Asian ethnic groups in which women were more likely than men to hold a degree. In 2001, 42 percent of Filipino women and 39 percent of Filipino men held degrees, while the comparable proportions for Thai women and men were 17 percent and 14 percent, respectively.

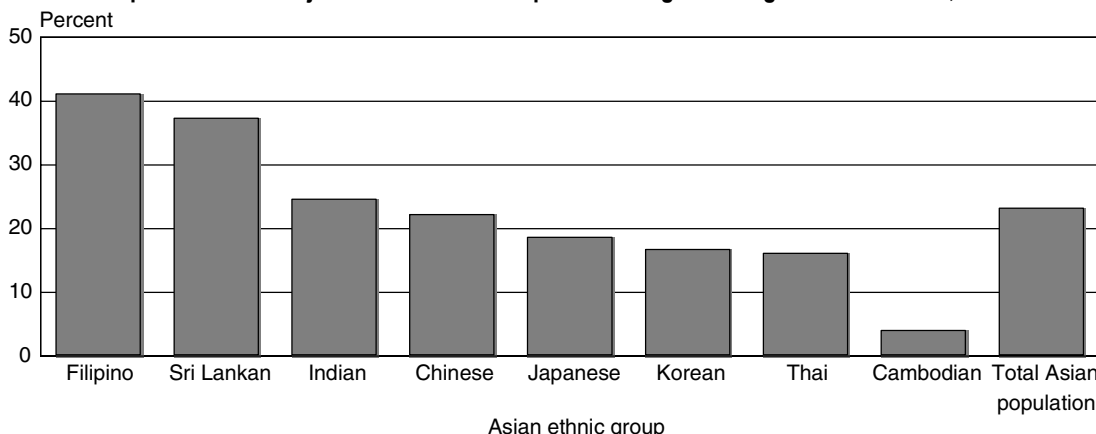

Income

The Asian population is less likely than the total New Zealand population to receive income from wages and salaries, investments or self-employment. The high proportion of recent arrivals to New Zealand, and the increasing proportion of young people studying are contributing factors.

In the 12 months prior to the 2001 Census, wages and salaries was the most common source of income for Asian people – received by 44 percent of Asian adults. The equivalent proportion for the total adult New Zealand population was 57 percent. Nineteen percent of Asian adults received income from investments, compared with 26 percent of the total New Zealand population. A further 14 percent of the Asian population received income from self-employment – 3 percentage points below the total New Zealand population.

Figure 4

Proportion of the Major Asian Ethnic Groups with a Degree or Higher Qualification, 2001

However, the New Zealand-born Chinese and Indian populations were more likely to receive income from wages and salaries (66 percent and 65 percent, respectively) than the total New Zealand population, and equally as likely as the total New Zealand population to receive income from self-employment (17 percent and 16 percent, respectively). Over a third (35 percent) of New Zealand-born Chinese received income from investments in 2001, while the equivalent proportion for New Zealand-born Indians (25 percent) was similar to that of the total New Zealand population.

In 2001, Asian people were equally as likely as the total New Zealand population to receive income from the community wage–job seeker benefit (both 7 percent), but less likely to receive income from the domestic purposes benefit (2 percent versus 4 percent). The relatively high proportion of Asian people studying contributes to the Asian population (7 percent) being twice as likely as the total New Zealand population (3 percent) to receive the student allowance.

Nearly a fifth (19 percent) of Asian adults stated that they had no source of income in the year preceding the 2001 Census – over three times as high as the equivalent proportion among the total New Zealand population (6 percent). Over half (55 percent) of Asian people who stated they did not have an income source were aged between 15 and 24 years.

The median annual income of the Asian population aged 15 years and over in 2001 was \$10,400 – relatively low when compared with the national median annual income of \$18,500. Low levels of labour force participation among the Asian population are a contributing factor to this difference, coupled with a younger age structure and the high levels of young Asian people studying. Although Asian people aged between 20 and 25 years

had a median income of \$4,900, those in the 25-34 year and 35-44 year age groups had much higher median incomes (\$17,100 and \$18,500, respectively).

In 2001, the median annual income of Asian women (\$8,900) equated to just over two-thirds of that of Asian men (\$13,100).

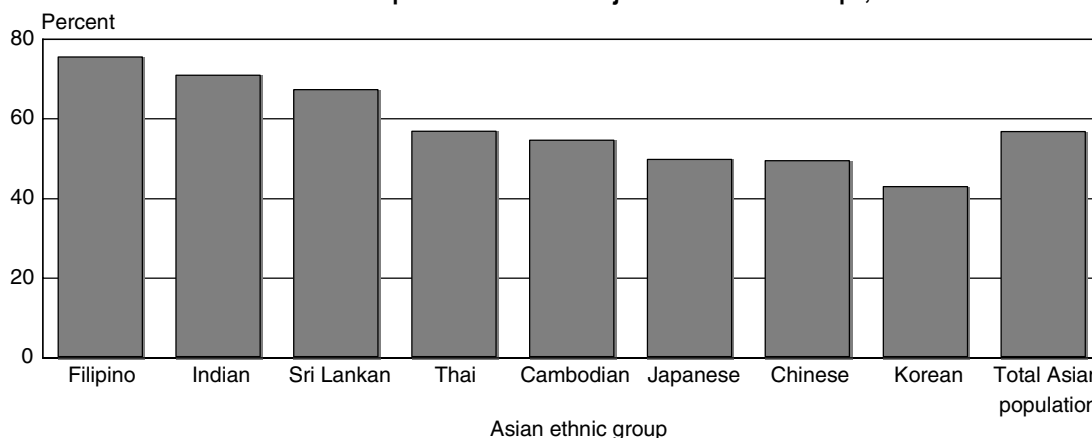

The Filipino ethnic group (\$17,500) had the highest median annual income among the Asian ethnic groups, followed by the Indian ethnic group (\$16,000). The lowest median annual income was reported by the Korean ethnic group (\$5,300) – reflecting the relatively low level of labour force participation among this group. New Zealand born Indians (\$16,900) had a higher median annual income than Indians born overseas (\$15,800). The median annual income of the New Zealand-born Chinese population (\$20,200) was higher than that of both the overseas-born Chinese (\$7,900) and total New Zealand populations, reflecting the higher labour force participation rate of New Zealand-born Chinese (see Labour Force below).

Labour Force

Overall, the Asian population has a lower rate of participation in the labour force than the total New Zealand population – reflecting the high levels of young Asian people studying. In 2001, 57 percent of Asian people aged 15 years and over were in the labour force either in full-time or part-time paid employment or actively seeking work. The labour force participation rate for the total New Zealand population was 67 percent in 2001. Forty-one percent of Asian people aged between 15 and 24 years were participating in the labour force, whereas for the total New Zealand population the equivalent proportion was 67 percent.

Figure 5

Labour Force Participation Rate of the Major Asian Ethnic Groups, 2001

Of those Asian people in paid employment, three-quarters were in full-time paid employment, while a quarter were in part-time paid employment – mirroring the national situation.

Among the Asian population, several groups had rates of labour force participation as high, if not higher, than the total New Zealand population. The New Zealand-born Indian and Chinese populations had high rates of participation (77 percent and 75 percent, respectively), as did the Filipino (75 percent) and Sri Lankan (67 percent) ethnic groups. In contrast, those in the Korean ethnic group had the lowest rate of participation in the labour force (43 percent). Overseas-born Chinese, who accounted for a third of the Asian population, had a labour force participation rate of 45 percent in 2001.

The unemployment rate for the Asian population was 13 percent in 2001 – one percentage point lower than in 1996, but still higher than in 1991 (10 percent). Over the decade, the unemployment rate for the total New Zealand population declined from 10 percent in 1991 to 7 percent in 2001. Asian people aged 15-24 years had a higher unemployment rate (23 percent) than those in the same age group in the total New Zealand population (17 percent). Among the Asian ethnic groups, unemployment rates were highest among Cambodians, Koreans and Sri Lankans (all 16 percent), while the Filipino ethnic group (9 percent) had the lowest rate of unemployment in 2001. New Zealand-born Chinese (8 percent) and New Zealand-born Indians (10 percent) were less likely to be unemployed than overseas-born Chinese (15 percent) and overseas-born Indians (11 percent).

Asian women were less likely to be in the labour force than Asian men (51 percent versus 63 percent), but those women in the labour force were slightly more likely to be unemployed than men (14 percent and 13 percent, respectively).

Asian people are highly represented in white collar occupations. In 2001, 43 percent of Asian people in paid employment were working in the occupational categories of professionals (18 percent); legislators, administrators and managers (14 percent); and technicians and associate professionals (11 percent) – a slightly higher proportion than the total New Zealand population in white collar occupations (40 percent). High proportions of Sri Lankans (55 percent), Koreans (50 percent), New Zealand-born and overseas-born Chinese (47 percent and 44 percent, respectively) and

New Zealand-born and overseas-born Indians (42 percent and 45, respectively) were also employed in white collar occupations. Cambodians (15 percent) and Thai people (19 percent) were least likely to be in white collar occupations.

While Asian people were more likely than the total New Zealand population to be employed as service and sales workers, they were less likely to be employed as agriculture and fishery workers and as trades workers. Manual occupations such as plant and machine operators and assemblers and elementary occupations (including labourers) accounted for 8 percent and 5 percent, respectively of employed Asian people – a similar level to that of the total New Zealand population.

Families and Households

A two-parent family remains the most common family type for Asian people. Although the proportion of Asian people living in a two-parent family has declined from 76 percent in 1991 to 70 percent in 2001, they are still more likely to be living in this situation than the total New Zealand population (57 percent). In 2001, 15 percent of Asian people were living in a one-parent family – 5 percentage points higher than in 1991. The proportion living as a couple without children was almost unchanged over the decade (15 percent in 2001). By comparison, 17 percent of the total New Zealand population were living in a one-parent family in 2001 and 26 percent were living as a couple without children. The majority of Asian children still live in two-parent families. In 2001, 80 percent of dependent Asian children were living in two-parent families – a decrease of 7 percentage points since 1991. The comparable proportion among the total New Zealand population in 2001 was 73 percent.

In 2001, 19 percent of Asian people were living in extended family situations – a group of related people that may consist of a family nucleus and one or more other related people. Of those Asian people living in an extended family, 64 percent were part of an extended family of three or more generations whereas the equivalent figure among the total New Zealand population was 56 percent. The average (mean) size of families containing at least one Asian family member was 3.2 in 2001 – a slight drop from 3.4 in 1991. In 2001, the average family size for the New Zealand population was 3.0 people.

Although most Asian people residing in private households in 2001 were living in one-family households (78 percent), 13 percent were living in households containing two or more families – an increase from 8 percent in 1991. The comparable figure for the total New Zealand population was 5 percent. Asian people are less likely to live alone than the total New Zealand population – reflecting the younger age structure of the Asian population. In 2001, approximately 3 percent of the Asian population were living in one-person households whereas 9 percent of the total New Zealand population were living in this situation. The average (mean) household size of households containing at least one Asian household member was 3.5 – the same as at the beginning of the decade. In 2001, the average household size for the New Zealand population was 2.7 people.

Access to Amenities

Asian people have high levels of household access to amenities such as the telephone, the Internet and motor vehicles. In 2001, 98 percent of the Asian population were living in households that had access to a

telephone, while 62 percent were in a household with Internet access. The equivalent figures for the total New Zealand population were 96 percent and 43 percent, respectively. Ninety-four percent of Asian people reported household motor vehicle access – a similar proportion to the total New Zealand population (93 percent).

The Sri Lankan and the Korean ethnic groups had the highest levels of household Internet access (78 percent and 76 percent, respectively), as figure 6 illustrates. Relatively high levels of Internet access were also reported by the Japanese (65 percent) and Filipino (60 percent) ethnic groups. The Thai ethnic group (43 percent) had a level of household Internet access similar to that of the total New Zealand population, while the Cambodian ethnic group had a relatively low level of access (33 percent). Among the Chinese ethnic group, overseas-born Chinese (69 percent) had higher levels of Internet access than New Zealand-born Chinese (58 percent). A similar pattern was apparent between overseas-born Indians (54 percent) and New Zealand-born Indian (48 percent).

- (1) Changes to the form of the ethnicity question used in the 1996 Census have resulted in some data that is not consistent between 1991 and 1996 nor between 1996 and 2001. More information on the changes and the impact on data can be found in the Explanatory Notes.
- (2) The ethnic data in this table has been output using up to three responses per person. If a person gave more than three responses, the three ethnic groups output are those that take highest priority under the priority recording system. This is the same method used in 1991 and 1996. Data for 2001 can also be output with up to six responses.
- (3) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted once in each applicable group.
- (4) The 1991 data was included within 'Chinese nec'.
- (5) The 1991 data includes Eurasian.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each language spoken, whether as their only language or as one of several languages. Where a person reported more than one language spoken, they have been counted in each applicable group.

(2) Categories in this table have been output where the total number of responses by Asian people has exceeded 1,000. All remaining categories have been grouped as 'Other Languages'.

(3) Includes Southern and Central Asia not further defined.

(4) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

- (1) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.
- (2) Categories in this table have been output for the eight largest Asian ethnic groups.
- (3) Changes to the form of the ethnicity question used in the 1996 Census have resulted in some data that is not consistent between 1991 and 1996 nor between 1996 and 2001. More information on the changes and the impact on data can be found in the Explanatory Notes.
- (4) The ethnic data in this table has been output using up to three responses per person. If a person gave more than three responses, the three ethnic groups output are those that take highest priority under the priority recording system. This is the same method used in 1991 and 1996. Data for 2001 can also be output with up to six responses.
- (5) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.
- (6) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.
- (7) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.
- (8) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

- (1) Categories in this table have been output for the eight largest Asian ethnic groups.
(2) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person stated more than one Asian ethnic group, they have been counted in each applicable group.
(3) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.
(4) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.
(5) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Categories in this table have been output for the eight largest Asian ethnic groups.

(2) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person stated more than one Asian ethnic group, they have been counted once in each applicable group.

(3) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(4) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(5) Includes Response Unidentifiable and Not Stated and responses to Years Since Arrival where they are inconsistent with Age Group.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each language spoken, whether as their only language or as one of several languages. Where a person reported more than one language spoken, they have been counted in each applicable group.

(2) Categories in this table have been output where the total number of responses by Asian peoples in a language category has exceeded 1,000. All remaining categories have been grouped as 'Other Languages'.

(3) Categories in this table have been output for the eight largest Asian ethnic groups.

(4) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(5) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(6) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(7) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

(2) Categories in this table have been output for the eight largest Asian ethnic groups.

(3) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(4) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(5) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(6) Includes Inadequately Described and Not Stated.

(7) Includes Response Unidentifiable and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

(2) Categories in this table have been output for the eight largest Asian ethnic groups.

(3) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(4) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(5) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(6) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Categories in this table have been output for the eight largest Asian ethnic groups.

(2) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(3) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(4) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(5) Includes Inadequately Described and Not Stated.

(6) Includes Highest Qualification Unidentifiable and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Categories in this table have been output for the eight largest Asian ethnic groups.

(2) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted once in each applicable group.

(3) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(4) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(5) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

- (1) Categories in this table have been output for the eight largest Asian ethnic groups.
- (2) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.
- (3) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.
- (4) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.
- (5) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Industry Classification ANZSIC96 V4.0.

(2) Categories in this table have been output for the eight largest Asian ethnic groups.

(3) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(4) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(5) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(6) Includes Inadequately Described and Not Stated.

(7) Includes Response Unidentifiable, Response Outside Scope, Refused to Answer, Don't Know and Not Stated.

All cells in this table have been randomly rounded to base 3.

(1) Absentees are excluded.

(2) People residing in households reporting more than one means of access to telecommunication systems have been counted in each stated category. Therefore the total number of responses in the table will be greater than the total number of people.

(3) This table cross-tabulates personal characteristics with the characteristics of the household a person is a part of. It counts people.

(4) Categories in this table have been output for the eight largest Asian ethnic groups.

(5) Includes all of the people who stated each Asian ethnic group, whether as their only Asian ethnic group or as one of several Asian ethnic groups. Where a person reported more than one Asian ethnic group, they have been counted in each applicable group.

(6) Includes Chinese not further defined, Hong Kong Chinese, Kampuchean Chinese, Malaysian Chinese, Singaporean Chinese, Vietnamese Chinese, Taiwanese Chinese and Chinese not elsewhere classified.

(7) Includes Indian not further defined, Bengali, Fijian Indian/Indo-Fijian, Gujarati, Tamil, Punjabi, Sikh and Indian not elsewhere classified.

(8) Includes Inadequately Described and Not Stated.

All cells in this table have been randomly rounded to base 3.

Explanatory notes

2001 Census Data Quality

General

For the 2001 Census of Population and Dwellings, Statistics New Zealand put in place a Quality Management Strategy (QMS) to ensure data from the census was fit for use. The QMS identified key actions Statistics New Zealand was to undertake during all phases of the 2001 Census cycle to ensure data quality.

At the processing phase of the census, certain quality assurance procedures were implemented to ensure that the data was recorded accurately and that any inconsistencies were minimised as the data was coded. These processes did not attempt to change the respondents' answers. The objective was to minimise introduced error in the data.

This strategy means that some inconsistencies may remain in the census data. There may, for example, be slight inconsistencies in table totals for some variables. These inconsistencies do not affect the fitness for use of data.

Further information on data quality in the 2001 Census can be found in chapter 7 of *Introduction to the Census*.

Data quality of income questions

The income question is not as well answered as other questions in the census for a variety of reasons. These include: social aversion (including a perceived connection to IRD); embarrassment due to low income; proxy form fillers not knowing incomes (this particularly affects people in hospitals and retirement homes); pooling of household incomes (family businesses, shared investments), individuals not handling the 'books' or not knowing the gross amount received from a benefit or pension. This has resulted in a higher non-response rate than for other questions. Groups particularly affected are the elderly, the young (who usually give less detail), those in receipt of a benefit or pension and certain ethnic groups.

Ethnicity

Changes to the form of the ethnicity questions used in the 1996 and 2001 Census of Population and Dwellings have resulted in some data that is not consistent between 1991 and 1996 or between 1996 and 2001. This applies particularly to the 'European' ethnic groups, including the 'New Zealand European' ethnic group, but

also to the 'Māori' ethnic group. Data between 1991 and 2001 may not be affected.

To measure real effects of population change, comparisons should be made between 1991 and 2001 Census data.

Changes in the ethnicity question

The ethnicity question in the 1996 Census had a different format from that used in 1991 and 2001. In 1996, there was an answer box for 'Other European' with additional drop down answer boxes for 'English', 'Dutch', 'Australian', 'Scottish', 'Irish', 'other'. These were not used in 1991 and 2001.

Furthermore, the first two answer boxes for the question were in a different order from those of 1991 and 2001. 'NZ Maori' was listed first and 'NZ European or Pakeha' was listed second in 1996. The 1991 and 2001 questions also used the words 'New Zealand European' rather than 'NZ European or Pakeha'. The 2001 question used the word 'Māori' rather than 'NZ Maori'.

In all three years, people could provide more than one response to the question, for example Māori and Samoan. The wording of the 1996 question made it more explicit that respondents could tick more than one box for the ethnicity question.

Copies of the layout of the questions are contained in the more detailed technical paper referred to later in this note.

Impact on data

Some data from the 1996 ethnicity question is not consistent with data from 1991 and 2001. This is due in part to the effect of the different question format rather than an effect of real change.

1. There have been increased counts for the additional 'Other European' categories from 1996. The increase was restricted to the 1996 data, with 1991 and 2001 being at much lower levels.
2. There was also a drop in 1996 in the level for some categories such as 'European not further defined'. This again is a result of people in 1996 ticking the additionally specific 'other European' categories but in 1991 or 2001 just writing 'British' or 'European'.

3. The count for the 'NZ European or Pakeha' category decreased in 1996 compared with that of 1991 and 2001. This may have been because some people in 1996 saw the additional 'other European' categories as better describing their ethnicity and so answered these rather than the 'NZ European or Pakeha' category. There may also be some impact on 1996 data from this category being second on the list rather than first.
 4. The count of 'Māori' ethnicity increased between 1991 and 1996 but there has been little change between 1996 and 2001. There may be some effect from the category being listed first in 1996 but second in the other years. Furthermore, additional categories may have increased multiple response, and there may be some effect from people answering on the basis of ancestry.
 5. There were more people who answered several categories in 1996 in comparison with 1991 and 2001. This has affected data comparisons for those who want to analyse single ethnicity response categories, including the sole Māori ethnic group.
2. Data for the 'Māori' ethnic group in the 1996 Census may not be consistent with that of 1991 or 2001.
 3. Data for the 'Asian' ethnic groups for the 1996 Census is less affected by the question changes.
 4. Data for the 'Pacific peoples' ethnic groups for the 1996 Census is less affected by the question changes.
 5. Data for single and combination ethnic groups for the 1996 Census is not consistent with that of 1991 or 2001.
 6. Data for prioritised ethnic groups for the 1996 Census is not consistent with that of 1991 or 2001.

Statistics New Zealand will not revise the 1996 Census data to impose consistency with the 1991 or 2001 ethnic data.

Further information

A technical paper with further details and analysis of the data is available at www.stats.govt/ethnicity.

General Terms and Definitions

General definitions can be found in *Definitions and Questionnaires*.

Cautions for users

As a result of these question and data changes, it is recommended that users note:

1. Data for the European ethnic groups in the 1996 Census is not consistent with that of 1991 or 2001. This includes data for the 'New Zealand European' subgroup, as well as other European subgroups such as 'Irish', 'Welsh', 'Dutch', and 'Italian'.
