

Tier 1 statistics 2012

The following list of Tier 1 statistics was approved by Cabinet in August 2012.

Tier 1 statistics are the most important statistics, essential to understand how well New Zealand is performing. Tier 1 statistics:

- are essential to critical decision-making
- are of high public interest
- meet expectations of impartiality and statistical quality, in accordance with the Principles and Protocols for Producers of Tier 1 Statistics:
www.statisphere.govt.nz/tier1-statistics/principles-protocols.aspx
- require long-term data continuity
- allow international comparability
- meet international statistical obligations

Notes for the list:

Status:

Current T1' denotes statistics from the 2005 Tier 1 list.

'Classify as Tier 1' denotes statistics that are already being published or can be readily derived. They will generally be produced in 2012/13;

'Development' denotes that some measures already exist but further development is required;

'Research' denotes statistics with valid indicators in development and need for the data identified.

Year of entry:

Denotes the year that statistics with a status of 'Classify as Tier 1' will be published.

For statistics denoted as 'Research' or 'Development', the year of entry indicates when development of the statistic to Tier 1 standards will be complete.

However, the statistic may not be published that year.

Frequency:

Indicates the minimum frequency of formal release of the Tier 1 statistic.

Progress on this list is updated quarterly.
