External trade key points: year ended December 2010

New Zealand's merchandise exports were valued at \$43.5 billion in the year ended December 2010, up 9.7 percent from \$39.7 billion in the December 2009 year.

The largest increase in export value was in dairy, up \$2.3 billion (28 percent) for the year. The second-largest increase was in wood, up \$630 million (27 percent). The largest offsetting decrease was from starch (which includes casein), down \$160 million (15 percent).

The total value of New Zealand's imports for the year ended December 2010 was \$42.4 billion, up 5.3 percent from \$40.2 billion in the December 2009 year.

Vehicles lead the increase in imports, with a \$1.0 billion (32 percent) rise for the year. The second-largest increase was in mineral fuels, which was up \$631 million (11 percent). The most significant offsetting decrease for the year was in aircraft, which was down \$731 million (48 percent).

Exports

- Australia continued to be New Zealand's principal export market, receiving 23 percent or \$10.0 billion of New Zealand's exports for the year ended December 2010. China remains New Zealand's second-largest export market, receiving 11 percent of total exports, or \$4.8 billion. The United States is the third-largest export market, receiving 8.6 percent of total exports, or \$3.8 billion.
- Exports to APEC economies accounted for 71 percent of New Zealand's total exports and were worth \$31.0 billion in the year ending December 2010. The European Union accounted for 11 percent (\$5.0 billion) of total exports.
- The [Harmonised System \(HS\)](#) chapter heading 'dairy' continued to be New Zealand's largest export earner in the December 2010 year, accounting for 24 percent of total merchandise exports and valued at \$10.4 billion. Meat and wood were our two next-largest export products, accounting for 12 and 6.8 percent of total exports, respectively.
- Applying the [level of processing \(LOP\) classification](#), in the year ending December 2010, 69 percent of all exports were primary products and 26 percent were manufactured goods. Of the primary products, 53 percent were processed. Of the manufactured goods, 64 percent were elaborately transformed. New Zealand exported 38 percent of all manufactured goods and 16 percent of all primary products to Australia. Ninety-one percent of all exports to China were primary products.

Imports

- Australia remained New Zealand's largest source of merchandise imports in the year ended December 2010, accounting for 18 percent of total imports. Total imports from Australia were valued at \$7.7 billion, a 4.1 percent increase from the December 2009 year. China was New Zealand's second-largest source of imports, contributing 16 percent of total imports. Other major sources of imports for New Zealand were the United States and Japan, which respectively accounted for 10 and 7.3 percent of total imports.
- Imports from APEC economies were valued at \$31.6 billion and accounted for 75 percent of total imports in the year ended December 2010. Imports from the European Union were valued at \$6.2 billion for the December 2010 year, and contributed 15 percent of total imports.
- New Zealand's highest-valued imported HS chapter heading in the year ended December 2010 was mineral fuels, worth \$6.5 billion and accounting for 15 percent of total imports. Other significant imports included machinery (\$5.2 billion), vehicles (\$4.3 billion), and electrical machinery (\$3.6 billion).
- Under the LOP classification, in the year ending December 2010, 28 percent of all imports were primary products and 71 percent were manufactured goods. Of the primary products, 52 percent were processed. Of the manufactured goods, 88 percent were elaborately transformed. Fifty-six percent of all manufactured goods imported were mechanical and electrical machinery and equipment.

Services

In the year ended December 2010, New Zealand's service exports were worth \$12.1 billion, down \$457 million from the December 2009 year. This is the lowest value of services exported since the year ended December 2003. New Zealand imported services to the value of \$12.7 billion in the year ended December 2010, up \$149 million from the December 2009 year.

Overseas visitors

Permanent, long-term, and short-term overseas visitor arrivals numbered 2.6 million in the year ended December 2010, an increase of 63,000 visitors from the December 2009 year. The largest sources of visitors to New Zealand in the year ended December 2010 were Australia (44 percent of all visitors), the United Kingdom (9.5 percent), and the United States (7.4 percent). Visitors from Australia increased the most, up 38,000 (3.5 percent). The next-largest increase was for visitors from China, up 21,000 (19 percent).

General issues

The commodity tables show the principal markets for New Zealand's exports (and some imports) of several product groups, including agriculture, non-agriculture, dairy, meat, fruit and vegetables, forestry, and machinery. Economic groupings, and the geographic country aggregations that make up the geographic regions used in the text, are defined in the appendixes at the end of this publication. Other definitions, for example the services definitions, are those Statistics New Zealand uses and are based on standard International Monetary Fund criteria. A summary of these definitions also appears at the end of this publication.

Re-exports

Re-exports record goods brought into New Zealand and exported without a 'substantial transformation'. The yardstick for measuring 'substantial transformation' is '50 percent value added' and above that level, the goods are classified as domestic exports. Trans-shipment goods are not included. Goods that are re-exported will have previously figured in some form in the import statistics.

Appendix 6: Standard definitions and notes

Agricultural exports	This uses the standard World Trade Organization (WTO) definition for agriculture. Products include Harmonised System (HS) codes 1–24 inclusive, with the exception of HS 03 and some of HS 16 (processed fish). It also includes casein, hides and skins, and raw wool.
cif	Cost, insurance, freight – the market value (or fob equivalent) of the imported goods plus the cost of freight and insurance from the source to destination.
Confidential classifications	Under section 37A (d) of the Statistics Act, the Government Statistician may disclose details of external trade, movement of ships, and cargo handled at ports. However, Statistics New Zealand understands that the release of merchandise trade commodity information can, in some cases, place commercially sensitive information in the public domain. This can have detrimental effects upon companies that export and/or import goods. In light of such circumstances, Statistics NZ is able to provide a limited form of confidential status for commodity items (at the discretion of the Government Statistician) upon application by a company or business. In practice, all confidential HS codes are aggregated into the code 9809.00.00.00 in order to protect their confidentiality and to maintain total export and import values. Any aggregations of HS codes below this level, which encompass confidential 10 digit codes, exclude the confidential value(s) for these codes.
fob	Free on board – the value of the goods delivered to the port of export and loaded onto a vessel for transportation out of the country of origin. Used for exported goods.
Government services nie	These comprise transactions of central government, the central bank, and local government. Both New Zealand government and foreign government transactions are recorded.
Insurance	Insurance and re-insurance of all types, including freight insurance. The values recorded alongside insurance measure the value of insurance services provided by an economy to non-residents (the Ministry of Foreign Affairs and Trade (MFAT) ‘exports’ series or, in Balance of Payments (BoP) terms, the credit item) and the value of insurance services purchased by residents from non-residents’ insurers (the MFAT ‘imports’ series, or BoP debits item). Insurance services is measured by multiplying the total amount of insurance premiums exported or imported by the five-year average domestic service charge ratio. The latter is the ratio of the domestic insurance service charge to total domestic premiums when the service charge is calculated as premiums minus claims.
Merchandise goods	Tangible, movable goods crossing the customs frontier.
nes	Not elsewhere specified
nie	Not included elsewhere
Non-agricultural exports	This uses the standard WTO definition. Non-agricultural exports comprise all other exports not included in agricultural exports.
Non-merchandise goods	Goods returned after repair or modification in New Zealand; goods on short-term loan or lease; and service transactions, eg computer data tapes and drawings.
Other	This item covers those international service transactions not covered under the travel, transportation, insurance, or government services nie items. They include communication services, construction services, financial services, computer and information services, royalties and licence fees, personal, cultural and recreational services, and other business services. Other business services includes merchanting, and other business, technical and professional services.
Re-exports	This data records goods brought into New Zealand and exported without a ‘substantial transformation’. Although not a hard and fast rule, 50 percent value added is used as a yardstick to measure ‘substantial transformation’; above that level, the goods are classified as domestic exports. Trans shipment goods are not included. Goods that are re-exported will have previously figured in some form in the import statistics. Re-exports are included in the general tables of this publication.

Services	Items that are generally intangible or not physically movable (eg export education and tourism).
Transportation	Transportation measures the value of transactions in transportation services between residents of different economies. Transportation services are those services provided through carriers (such as ships and aircraft) by their operators, and the goods and services consumed by carriers in the course of their operations. By international convention, exports are foreigners carried by a New Zealand carrier, either here or overseas. Imports are New Zealanders carried by a foreign carrier. New Zealanders carried by a domestic carrier (either here or overseas) constitute a domestic transaction and are not part of international trade. The types of services provided through carriers include the carriage of freight (exports and imports) and passengers. Other transportation services covered include the charter of carriers, and airport and harbour fees. Goods consumed by carriers in the course of their operations, including bunkering and provisioning, are recorded under merchandise goods.
Travel	Travel covers the goods and services acquired from an economy by individuals defined as travellers during their stay in that economy. The international carriage of travellers is not included here but is classified as transportation.
vfd	Value for duty – the market value of imported goods as used for Customs' valuation purposes for tariff assessment in New Zealand.
Additional notes	The merchandise trade statistics are incompatible with the services data. Services data is collected and collated by Statistics NZ in line with the principles set by the IMF for BoP data. These principles also have methodology for the collation and presentation of goods data that differs from that of the merchandise goods data used above. The key point is that one should not add the merchandise trade figures to services in order to obtain an overview of 'goods and services trade'. Instead, readers are referred to the full BoP series, which adjust merchandise goods values according to the principles set down by the IMF. In particular, the value of imported goods is adjusted to a fob-equivalent basis in BoP statistics, but not in merchandise trade series. Further information on BoP concepts and methods is available from Statistics NZ.
